Management Discussion and Analysis

Economic & Industry Overview

Economic developments globally for the last few years are very volatile with debt crisis in Europe, large swings in investment sentiment, state of US economy, etc. The year under review was also adversely affected by severe inflationary pressures, raising interest cost, volatile rupee-dollar ratio with a tendency to get weaker and currency concerns in many trading partner-countries.

Pharmaceutical industry is presently facing many challenges and uncertainties. The industry continues to grow modestly, while adapting to unparalleled changes. This is putting pressure on the companies to focus on ways to increase the productivity and streamline the significant overheads.

Pharmaceutical market research firm, IMS Health forecast that the global pharmaceutical market will grow between 3% and 6% annually up to 2015, based on sales of US\$ 856 billion in 2010. According to the data, overall market volume should increase by between US\$ 210 billion and US\$ 240 billion up until 2015, then reaching a total volume of between US\$ 1,065 billion and US\$ 1,095 billion.

Pharmaceuticals markets both domestic and international are more prone to regulatory risks apart from the regular business risks.

Stringent regulatory norms like the Notification of new pricing policy is going to have a great impact on the whole industry by capping of prices of 348 essential medicines based on the arithmetic average of prices of all drugs in a particular segment with more than one per cent market share, any company changing composition of any of these drugs will need to seek a separate price approval from the regulator or empowered committee and prices will be reviewed periodically. It is estimated that around 30 per cent of the pharma market would come under price control as compared to 17 per cent previously. The Company manages its product portfolio so as to move away, reduce and minimize the product weightage of drugs under price control.

India's pharmaceutical industry is at an advantageous position compared to other emerging countries. The Indian pharmaceutical market is expected to grow at a compound annual growth rate (CAGR) of 14-17 per cent over 2012-16. India is now among the top five pharmaceutical emerging markets. The outlook on the Indian pharmaceutical industry remains favorable, according to a report by ICRA and Moody's.

Risks and concerns

The road ahead is challenging for the global and Indian pharmaceutical sector. The competition is expected to be more aggressive leading to price pressures. Uncertainty in global economic growth coupled with inflationary pressures is expected to impact the growth rate in India and consequently the Company's operations. Pharmaceuticals markets both domestic and international are more prone to regulatory risks apart from the regular business risks.

- Successfully launching “Raricap” in other countries namely Singapore, Sri Lanka. And plans for launch of Raricap across key geographies;
- Conscious decision for reducing the share of thin margin domestic institutional supplies by changing composition of sales more in favor of high margin branded business;
- We started focusing on Brands and branded generics in emerging market;
- We started focusing on Potent drugs in matured markets;
- Increase share of revenue from R & D;
- Improving revenue from existing RARICAP and its extensions & launch of new extensions for RARICAP;

a. Change in Presentation of financial statement:

During the year ended 31st March 2012, the revised schedule VI notified under the Companies Act, 1956, has become applicable to the company, for preparation and presentation of its financial statements. However, it has significant impact on presentation and disclosures made in the financial statements. The company has also reclassified, regrouped and rearranged the previous year figures wherever necessary in the current year.

b. Use of estimates.

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

c. Tangible fixed assets.

Fixed assets, acquired are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalized criteria are met and directly attributable cost or bringing the assets to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed assets is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard performance. All other expenses on existing fixed assets, including day to day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

SIGNIFICANT ACCOUNTING POLICIES

1. Corporate Information

Bafna Lifestyles Remedies Limited (The Company) is a public Company domiciled in India and incorporated under the Provisions of the Companies Act, 1956. The Company is engaged in the manufacture of drugs and Medicines. The Company caters to the domestic Market and is planning for exports in the future.

2. Basis of Preparation of Financial Statements

The financial statement are prepared under historical cost conversion, except for certain fixed assets which are revalued, in accordance with the generally accepted accounting principles in India and the provisions of the Companies Act, 1956.

Summary of Significant Accounting Policies

a. Change in Presentation of financial statement:

During the year ended 31st March 2012, the revised schedule VI notified under the Companies Act, 1956, has become applicable to the company, for preparation and presentation of its financial statements. However, it has significant impact on presentation and disclosures made in the financial statements. The company has also reclassified the previous year figures in accordance with the requirement applicable in the current year.

b. Use of estimates.

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

c. Tangible fixed assets.

Fixed assets, acquired are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalized criteria are met and directly attributable cost of bringing the assets to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of fixed assets is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard performance. All other expenses on existing fixed assets, including day to day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

d. Depreciation on tangible assets

The Company was charging depreciation on WDV method (written down value) till the previous year, but during the year, company has changed the method of depreciation from WDV to SLM. Due to change in the method of depreciation the amount of Rs.1,324.17/- (Rs. In '000) has been written back in the Profit & Loss as the exceptional item.

Depreciation on fixed assets is calculated on Straight Line Method (SLM) using the rates arrived at based on the useful lives estimated by the management or those prescribed under the Schedule XIV to the Companies Act, 1956.

Depreciation for additions to / deletions from owned assets is calculated on pro rata from / to the day of addition /put to use and up to date of deletion.

e. Borrowing costs

Borrowing cost includes interest. Borrowing costs directly attribute to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

f. Inventories

Raw materials, components, store and spares are valued at lower of cost and net realizable value. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost of raw materials, components and stores and spares is determined on a weighted average basis.

Work in progress and finished goods are valued at lower of cost and net realizable value. Cost includes direct materials and labour and a proportion of manufacturing overheads based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the site.

g. Revenue Recognition

Revenue from sale of products is recognized when practically all obligations connected with the transaction risks and rights to the buyer have been fulfilled and excluded sales tax and state value added taxes. This usually occurs upon dispatch and collection of the receivable is reasonably certain.

Interest income is recognized using time proportion method based on the rates implicit in the transaction.

h. Employee Benefits

Liability for employee benefits, both short and long term, which are due as per the terms of employment, are recorded in accordance with Accounting Standard -15 (Revised) "Employee Benefits" notified by the Companies (Accounting Standards) Rules, 2006.

i. Gratuity

BLRL has an obligation towards gratuity, a defined benefit retirement plan (Gratuity Plan) covering eligible employees in accordance with Indian Law. The Gratuity Plan provides for a lump sum payment to vested employees on retirement, death while employment or on termination of employment in an amount equivalent to 15 days last drawn salary payable for each completed year of services. The liability for the eligible employees is determined on the basis of actuarial valuation as on the balance sheet date, using projected unit credit method and is funded with Gratuity fund managed by **Life Insurance Corporation of India Ltd.**

j. Income Taxes

Current Tax

Current tax is determined in accordance with the provisions of Income Tax Act, 1961.
